

SHYAM SHAJI

MERN STACK DEVELOPER

shyamshaji2614@gmail.com | 8848678248 | Palakkad | [linkedin.com/in/shyam-shaji](https://www.linkedin.com/in/shyam-shaji) | shyamshaji.online

PROFESSIONAL SUMMARY

Full Stack Developer specializing in the **MERN stack** with a focus on building high-performance web applications that deliver excellent user experiences. Skilled at solving complex problems and writing clean, scalable code, and committed to contributing technical expertise and collaboration to transform ideas into impactful digital solutions.

SKILLS

Frontend Development: HTML, CSS, Tailwind CSS, React.js, Redux, Redux Toolkit, Hooks, Context API

Backend Development: Node.js, Express, MongoDB, PostgreSQL, Typescript, Nestjs

Deployment: AWS, EC2, Nginx, Git, GitHub, Vercel, Railway, Docker, CI/CD

APIs Architecture: RESTful API

Tools and Platforms: Postman, Firebase, Cloudinary, Razorpay

PROJECTS

WatchHub · Node.js, Express, MongoDB, EJS, Razorpay, RESTful API

⊕ [Project Link](#)

- Designed and implemented a robust e-commerce platform using MongoDB, Express.js, and Node.js, with EJS for server-side rendering.
- Integrated complete CRUD functionality for product management, enabling seamless creation, updating, deletion, and retrieval of watch listings.
- Integrated Google Sign-In for streamlined user authentication, enhancing accessibility and user onboarding.
- Incorporated OTP (One-Time Password) verification to enhance security during user authentication and account recovery processes.
- Implemented Razorpay payment gateway to facilitate secure and efficient online transactions.
- Implemented invoice generation for user transactions, delivering professional and detailed purchase summaries.
- Developed advanced features including coupon systems, product-specific offers, category-based discounts, and price range filtering to enhance user experience.
- Deployed the application on AWS EC2 with Nginx as a reverse proxy, ensuring scalability and high availability.
- Followed industry-standard practices for code structure, security, and performance optimization, ensuring a reliable and maintainable codebase.

Blog App · Node.js, Express, MongoDB, Typescript, Cloudinary, React.js, Axios

🔗 [Project Link](#)

- Developed a fully functional REST API for a blog platform using Node.js, Express.js, MongoDB, and TypeScript, following the MVC architectural pattern.
- Implemented CRUD operations to manage blog posts, enabling seamless creation, retrieval, updating, and deletion of resources.
- Integrated JWT (JSON Web Tokens) for secure user authentication and authorization ensuring protected API endpoints.
- Applied rate limiting to enhance API performance and prevent abuse optimizing request handling.
- Utilized Helmet to secure the API by setting HTTP headers improving protection against common vulnerabilities.
- Enabled CORS to support cross-origin requests ensuring compatibility with front-end applications.
- Implemented features for likes and comments enhancing user engagement and interaction with blog content.
- Integrated Cloudinary for efficient management and storage of media assets such as banners and images.
- Designed and structured the backend to ensure scalability maintainability and adherence to modern development best practices.

EDUCATION

Undergraduate, Bachelor Of Computer Applications (BCA), Sri Ramakrishna College of Arts & Science	· Coimbatore
Higher secondary, Bio Science, GVHSS	· Kerala

LANGUAGES

English (Professional), Malayalam (Native), Tamil (Fluent)
